Budget Reallocation — Current vs Proposed (Monthly)

Full Reallocation Plan

Campaign	Sum of Current	Sum of Proposed	Reason
Google - Pmax Listing IND	16200	10000	Weakest active Google campaign - 2.37x ROAS
FB - Conv TOF Multicategory US Direct	165500	165500	Steady 2.03x
Google - Pmax Listing INTL	17500	17500	Stable 4.06x - no urgent signal
Google - Pmax HP EOSS Ind	18700	18700	ROAS fell 6.4x to 2.77x recently - hold and monitor
NEW - Test FB creative refresh	0	48300	Replace fatigued top creative - expand retargeting
FB - Other smaller long tail campaigns	50800	30000	Mix of results - review individually before restoring
FB - Conv TOF Multicategory CA Direct	134300	100000	Marginal 1.67x - redirect part of this spend

Final Recommendation — Management Summary

1. What is working?

Google Ads is the most efficient channel — ₹5.86 back per ₹1 spent, 3x Facebook's return. Facebook's CTR (6.52%) is strong. India is the top market on both platforms.

2. What is not working?

Efficiency has fallen on both platforms since June — Google ROAS from 7.4x to 3.4x, Facebook from 2.2x to 1.5x. Facebook's cart-to-checkout has a ~99% drop.

3. Who are the winners?

Google's two Search campaigns (9.6x+ ROAS). Facebook's 'MOF & BOF' campaign (2.28x at ₹15.7L spend) and the lookalike ad set (2.23x).

4. Who are the losers?

32 of 96 meaningfully-spent Facebook ads return under ₹1 per ₹1 spent. 'Conv TOF Multicategory INT Direct' returns just 0.47x.

5. Where would you increase budget?

Both Google Search campaigns (+33-44%), the Facebook lookalike ad set (+73%), and 'MOF & BOF' (+12%).

6. Where would you reduce budget?

The largest Facebook campaign by spend (-19%), 'Conv TOF Multicategory INT Direct' (-80%), and the weakest active Google campaign (-38%).

7. Why is the brand not scaling?

Efficiency decay since June, an unexplained Facebook checkout drop-off, and budget not matched to proven efficiency.

8. How would you reach 25% more sales at the same budget?

+25% sales needs exactly +25% better ROAS (3.83x to 4.78x). Reallocation alone likely closes 8-12%. The rest depends on fixing the checkout drop-off and reversing the efficiency decline.

9. Top 5 actions:

- Execute the budget reallocation plan
- Audit the Facebook checkout tracking within 2 weeks
- Refresh top ad creatives on a 6-8 week cycle
- Run the Middle East paid test
- Set up a recurring monthly budget review
